

# Examples

## Basic Usae

```
#import "@preview/lasagna:0.1.0": *
#let layer = view-layer(tags: ("shown"))
```

This is always shown

```
#layer("hidden")[
  This is hidden
  #layer("shown")[
    But this is shown
  ]
]
```

```
#layer(("shown", "another-tag"))[
```

You can also assign multiple tags, as long as 1 tag matches it will be shown

```
]
```

## Questions with/without answers

```
#let layer = view-layer(tags: (
  // use comments to toggle the layers
  "ans-space",
  // "ans",
))
```

Question 1: What is 2+2?

```
#layer("ans")[
  4
]
#layer("ans-space")[
  #v()
]
```

## Wrap other tools

(Using big todo as an example)

```
#import "@preview/big-todo:0.2.0": todo
#let layer = view-layer(tags: (
  "todo"
))
#let old-todo = todo
#let todo(..args) = layer("todo", old-todo(..args))
```
